

Medium-Duty Tent and General Use Flooring and Turf Protection

75,000 people? No problem. Forklifts, trailers, and other light vehicles? Not an issue. For ultra-large events, UltraDeck has got you and your turf covered. Perfect for large-scale tents, stadium shows, and special events, UltraDeck is a modular medium-duty turf protection system designed to offer a greater level of protection, rigidity, and weight-loading capability. In situations where light utility vehicles are required, UltraDeck is perfect for providing the robust, rigid surface you need while still maintaining an aesthetic, level surface for pedestrian use.

UltraDeck is built larger and thicker than Signature's general purpose EventDeck®, yet still maintains the same degree of grass and turf protection. They reduce the impact on your turf to the absolute minimum, despite the load they can handle; be it scissor lifts, forklifts with pneumatic tires and light trucks. UltraDeck is also just as easy to install and requires no tools to put together. A full-size 80,000 ft² stadium can be installed in 4 hours using only 20 workers.

ULTRADECK 1

12 in (30.5 cm)
24 in (61 cm)
1.1 in (2.9 cm) thick

FEATURES & BENEFITS

- Leaves no impact on event ground or carpet
- Save costs on labor and installation
- Simple, clip connection system
- Strong enough to support forklifts and light vehicles
- Expansion Joint eliminates warping due to heat
- Available in two versions

UltraDeck Expansion Joint

Only Signature Systems Group has an engineered solution to protect stadium covers from temperature fluctuation. UltraDeck Expansion Joint accommodates thermal expansion in our temporary flooring and prevents buckling and deformation. No other system has such a patent-pending feature.

Buyer's Guide to Portable Flooring

EventDeck®: Light-duty turf protection. For use at small to medium sized events in which natural grass and turf protection is the priority.

UltraDeck: Medium-duty turf protection and tent flooring. Ideal for use at medium to large sized events and features a greater degree of protection and weight loading capability.

ArmorDeck®: Heavy-Duty ground protection and event flooring. Features the greatest load capability while maintaining full turf protection. For use at large sized event or light industrial applications.

SPECIFICATIONS

Module Size

12 in x 24 in x 1.1 in (31 cm x 61 cm x 3 cm).
Ships in pre-assembled 3 ft x 4 ft (0.9 m x 1.2 m) panels.
Transitional edging is available.

Material

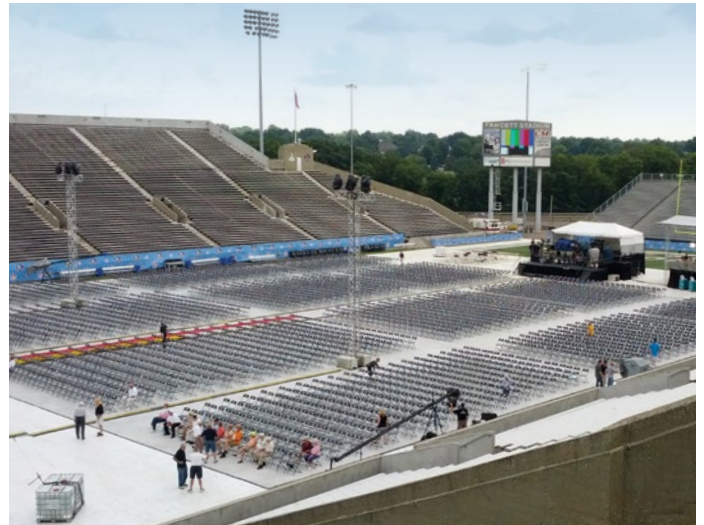

High-impact polypropylene

Weight

2.9 lbs (1.3 kg) per tile – 1.4 lbs/ft² (7 kg/m²)

Weight Load

20,000 lbs/ft² (97,648 kg/m²) static load, solid sub-surface
